

Overview of Requirements: Prescribers

State/Territory	Who can Prescribe?	Who can access?
Queensland	- Specialist practitioner (patient class pathway) - General practitioner in consultation with a medical specialist (single patient)	- Severe muscular spasms and other symptoms of multiple sclerosis - Some types of epilepsy with severe seizures - Chemotherapy-induced nausea and vomiting - Palliative care
Victoria	Any registered medical practitioner is able to prescribe medicinal cannabis for any patient with any condition, if they believe it is clinically appropriate and have obtained the required Commonwealth and/or state approvals.	Legal medicinal cannabis products can only be accessed via treating doctors or specialists, and only if they believe medicinal cannabis will be beneficial in the treatment of a patient's condition.
Australian Capital Territory	Registered medical practitioners holding authority from ACT Chief Health Officer (CHO), only granted once prescriber has authority to prescribe from the TGA	Products outlined by the OCD and TGA for specific conditions (not specified by ACT Health)
New South Wales	Medical practitioners complete 1 form (doesn't require approval from both NSW Health and TGA) If the cannabis medicine is schedule 8, there is also a requirement for NSW Health authorisation.	- Patient who the practitioner believes will benefit from MC (evidence required in application) - Patients with a terminal illness
South Australia	Specialist medical practitioner	- Multiple sclerosis - Severe intractable epilepsy in children - Intractable nausea and vomiting due to chemotherapy
Western Australia	Specialist practitioner; General practitioner in consultation with a medical specialist, neurologist; rehabilitation physician; or other specialist as determined by the CEO	Multiple sclerosis
Tasmania	Authorised medical specialists under the Medicinal Cannabis controlled access scheme (GPs not allowed to prescribe)	Relevant medical specialists must apply for an authorisation for each patient and condition they wish to trial with a product
Northern Territory	Northern Territory doctor who is authorised under the Special Access or Authorised Prescriber Schemes administered by the TGA	Access is restricted to appropriate patients with certain medical conditions where there is evidence to support its therapeutic use (as per TGA and ODC)
